LK SERIES COMPRESSORS PROVIDE LOW CAPITAL COST AND LOW OPERATING COST

Low cost of ownership throughout life cycle

Compressed air is often referred to as the 'fourth utility' and is critical to most manufacturing operations. Facility performance depends upon compressor reliability and efficiency.

Power consumption is a significant cost throughout the life cycle of a compressor. Therefore, it is important to consider the life cycle cost of a compressed air system when evaluating productivity improvements. LK series advanced energy saving features reduce operation costs significantly.

LK SERIES CONTROL SYSTEM PROVIDES TOTAL MANAGEMENT OF ALL OPERATING PARAMETERS

LK MAM 6090 controller capabilities include the following features:

- Operating parameters display, including amps & volts
- Warning & shutdown alarms
- Programmed maintenance schedules

LK series System Management Control Panel

The LK contains an intuitive HMI with microprocessor controller that can safely and efficiently control all the functions of the compressor.

The display monitors the line pressure, oil temperature and working conditions (running, idling and stop). Abnormal conditions will trigger a flashing LED and a message indicating the cause for the alarm. Key functions are password protected, accessible only to authorized personnel.
